## Get your own Red Carpet Glow on!

Saturday, February 21, 2009 at 7:15AM

Have you ever wondered how to achieve that radiant, glowing skin that shines on the Red Carpet? I'm here to tell you how you can get your own Red Carpet glow.

**Intracuticals Oxygen Skincare Treatments** are your answer!

Intracuticals website describes the treatment here: Utilizing high pressure therapeutic grade Hyperbaric Oxygen in their line of skin care products, Intracuticals combines medical and cosmetic science to develop a revolutionary professional skin care brand. Developing a serum that when used in conjunction with oxygen, plumps and hydrates the surface of the skin to smooth fine lines and wrinkles. Intracuticals' line of skincare products was designed to combat free radical attack, replenish the skin's natural lubricant, supply essential vitamins and restore elasticity. With locations all over the world, Intracuticals

also offers clients Atoxelene Infusion treatments. A topical alternative to anti-wrinkle injections, Atoxelene can be applied without needles and most importantly, pain. In just 10 minutes, this skin smoothing complex targets expression lines and wrinkles and assists in the prevention of new line and wrinkle formation without that nasty paralysis other treatments can cause.

I have done this treatment on many of my clients and have seen incredible results. Whether it is on set or prior to a big event, they love the result of this treatment. The "glow" last a few days, but is at its' peak the day of and the day after your treatment.

Now, go get your glow on! ;K

Keep Glowing~
